

DISASTER STAFF SCHEDULING

BE PREPARED FOR RAPID DISASTER STAFFING

During a disaster, every second counts. Coordinating the schedules of government agencies, first responders, non-governmental organizations (NGOs), military and volunteers is vital to saving lives and gaining control of chaotic situations. Schedule360™ is a secure cloud-hosted solution that enables you to proactively communicate with response personnel using the latest online and mobile technologies. Real-time visibility of work schedules allows you to identify available staff with the proper skills/certifications to work in areas that require additional staffing.

Hospitals also utilize Schedule360 to manage staffing in real time and instantly communicate with clinical staff to ensure proper emergency response to treat incoming patients. Schedule360 supports multi-organization scheduling, centralized communication and mass notification with real-time data.

The Scheduling Solution Configured for YOU

Schedule360 is highly configurable and can be configured to fit your organization's unique needs. It can even be configured with different setups for each department or group within your organization.

Affordable Pricing

Schedule360 is available at an affordable monthly subscription and includes setup, 24/7 support and online training. It is scalable to virtually any size organization.

The Schedule360 Advantage

- » *Configures to how YOU work*
- » *Unlimited scalability*
- » *Web-based anywhere access*
- » *Secure cloud-hosted convenience*
- » *True employee self-scheduling*
- » *Easy to learn and use*
- » *Affordable monthly subscription*
- » *Set-up and online training included*
- » *24/7 Customer support*

Schedule360 Delivers Time And Cost Savings

Schedule360 is scalable and configurable, so it can be utilized in “normal mode” for daily routine scheduling of employees and instantly switched into “disaster mode” with the click of a mouse to orchestrate your disaster plan.

» **Advanced Scheduling Automation**

Instantly identify available staff with the proper skills/certifications to work in the areas that require emergency staffing

» **Real-Time Communication**

Instantly communicate essential information to your response team’ e-mail, message boards and mobile devices

» **Proactive And Responsive Staff Scheduling**

Ensure your response teams are properly staffed at all times to address the emergency at hand; easily make staff adjustments as needed to address developing situations

Getting Started Is Easy

Make Schedule360 part of your disaster preparedness initiatives. Because Schedule360 is a secure cloud-hosted application, there is nothing to download or install. We assign a dedicated Schedule360 representative who works with you to understand your unique scheduling needs, provides expert consultation and manages your setup with our IT, training and administrative teams.

About Schedule360

Since 2000, Schedule 360 has been exclusively dedicated to developing web-based employee scheduling applications that simplify scheduling and labor management. Our mission has always been to deliver the most robust, easy-to-use, flexible and affordable employee scheduling applications using the latest Web and mobile technologies. We have developed our Schedule360 Employee Scheduling and Labor Management Applications with unmatched configurability and scalability so they can fit the way YOU work without compromise.
